

Synerex License as Access Authorization

Drop-in agreement language stating that an issued Synerex license is the sole authorization to access and use the cloud-hosted EM&V; or Tracking Program.

Access is conditioned on a valid, unexpired, non-revoked license and successful verification by the Synerex License Service.

The license defines scope: program, tier, roles, features, limits, and (for Tracking) baseline lineage.

- License = sole authorization for cloud access.
- No separate right of access exists without a valid license.
- Derivative artifacts (downloads, evidence packages) are governed and auditable.
