

# Synerex Platform – Investor Due Diligence Overview

Synerex is a defensible energy measurement, verification, and tracking platform built around patented electrical current balancing and network-wide EM&V; methodologies.

- Patented Technology (US-12,375,324-B2)
- Cryptographic licensing and enforcement
- Utility-grade audit and evidence chain
- OEM sublicensing architecture

The platform integrates legal, technical, and operational controls into a single system of record, reducing risk and increasing valuation defensibility.
